No child should die of diabetes

Annual Report 2016

Crucial care  Education  Research  Advocacy

LIFE FOR A CHILD
an International Diabetes Federation Programme

Annual Report 2016
During 2016 the program has supported the diabetes management of 18,653 young people in 42 countries. Since inception in 2001 the program has expanded considerably, and the focus has extended beyond keeping children and young adults alive, to improving clinical outcomes and quality of life. During 2016 a wide range of initiatives have been developed in patient and family education, health professional training, mentoring and relevant clinical research.

This work would not be possible without the generous support of our partners and donors – THANK YOU!

Dr Graham Ogle
General Manager

Mission

Our mission is to support the provision of the best possible health care, given local circumstances, to all children and youth (under 26 years of age) with diabetes in less-resourced countries, through the strengthening of existing diabetes services.

Conduct international advocacy and clinical research, and where possible help both young adults and also recipient countries with achieving sustainability.

Supporting 18,653 young people in 42 countries
HIGHLIGHTS

A seven year retrospective review shows an encouraging improvement in HbA1c for children supported by the program in Haridwar, India.

13 mentoring site visits conducted by health professionals with expertise in pediatric diabetes.

Education workshops were held in Liberia and Nepal.

Hindi and Swahili education resources added to our online library, which now totals eighteen languages.

Study published in *Diabetic Medicine*: “Insulin storage in hot climates without refrigeration”.

Camps held in Haiti, Democratic Republic of Congo, Guyana and Tanzania.

DKA Awareness campaigns undertaken in Pakistan with posters in Sindhi and Urdu.

Life for a Child USA launched, facilitating tax deductible donations to Life for a Child for US residents.
